3.4.2. <i>Registered laboratory</i>	30
3.5. FEED RESPONSIBILITY ACTIVITIES	31

Welcome

This Feed Certification Scheme document helps you to provide feed safety worldwide. By meeting the requirements set by GMP+ International together with our GMP+ Community, we aim to help you get the feed certification you need. Please read the information in this document carefully.

Let's make this work together!

1. Introduction

1.1. Scope of this document

This document gives information on the GMP+ scopes for certification, which are assigned to a company after a successful audit. This is part of the GMP+ certification framework.

Chapter 2, gives an overview of the link between scopes and the most important scheme documents.

Chapter 3 contains a more detailed description of the activities that are included in a specific scope. It also provides some additional information for each scope.

2. GMP+ Scopes for certification

2.1. Principles of the GMP+ scopes for certification

GMP+ scopes for certification can be characterized as follows:

- a fixed description of activities and products that are ensured under the scope of the Feed Safety Management System of a feed company. This fixed format consists of an activity in combination with a feed product or feed service. Example: Production of compound feed.
- Compliance with accreditation standards and feed legislation.
- part of GMP+ certification assigned to a feed company after a successful audit. Feed companies, ensuring similar activities and products, get the same GMP+ certification scope.

2.2. GMP+ Scopes related to Scheme documents

For each GMP+ scope for certification Scheme documents (Feed Safety Management System Requirements and/or Technical Specifications) are applicable. In the tables below you can find per GMP+ scope for certification which Scheme documents are applicable.

When reading these tables keep in mind:

- a) It remains the responsibility of the GMP+ certified company to select all relevant scheme documents and to comply with all relevant requirements. Although special attention was paid when drawing up these tables, it might be possible that because of your specific activities, you also have to comply with other scheme documents than indicated in the tables, or with specific national legislation.
- b) *Add-on scopes* can only be assigned in addition to a Basic scope. *Add-on scopes* are to be considered as an additional specification of this Basic scope.
- c) It is possible that certain requirements do not apply because of the specific activities of a GMP+ certified company. A GMP+ certified company may exclude these requirements. Exclusions must, however, be justified and recorded as documented information. The exclusion may not, in any event, have a negative impact on the feed safety of the activities, processes, products or services ensured via a GMP+ scope for certification.
- d) Requirements may not be excluded because the certified company does not consider them to be relevant. For example, because customers do not ask for them, or because compliance with these requirements is not a legal obligation; or because the certified company considers itself too small.

3. Specification of the Scopes for certification

In this chapter for each defined GMP+ scope for certification a table gives relevant information. These tables are structured like this:

GMP+ Scope for certification	<i>Fixed description of the GMP+ certification scope.</i>	
Scope of accreditation	<i>The category as defined in ISO/TS22003 (2013), Annex A.</i>	
Description	<i>More detailed description of the (sub)activities and process steps that belong to the GMP+ certification scope.</i>	
Specification of scope for certification	<i>More detailed information about which activities and feed products and/or feed services are actually assured with the Feed Safety Management System</i>	
	<i>For some GMP+ certification scopes it is mandatory to add specific information. For other GMP+ certification scopes it is an option to add specific information.</i>	
	Mandatory	Optional
	<i>A mandatory specification of the GMP+ scope for certification.</i>	<i>The possibility to add more information to the GMP+ scope for certification..</i>
Add- on scopes	<i>These scopes are linked to a main GMP+ certification scopes, via application of a country note.</i>	
	Add-on scope	GMP+ standard
	<i>The name of the scope.</i>	<i>The name of the GMP+ standard.</i>

3.1. Animal feed production

3.1.1. Production of compound feed

GMP+ Scope for certification	Production of compound feed	
Scope of accreditation	D. Animal Feed Production DI. Production of Feed	
Description	<p>All activities related to the manufacturing of compound feed.</p> <p>In addition to actual production activities (like milling, mixing and pressing), this includes activities required for production of compound feed, including planning, procurement, transshipment, storage, internal transport and packaging. Of course, also sales of the produced compound feed is included in this scope.</p> <p><i>Notes:</i> <i>Activities related to the delivery of the feed to customers are considered to belong to Transport. This is a separate scope.</i></p> <p><i>When storage is offered as a service to other companies, this is to be considered to belong to Storage and Transshipment. This is a separate scope.</i></p> <p><i>Sales of purchased feed products without any processing is considered to belong to Trade in Feed. This is a separate scope.</i></p>	
	See Table 1 in Chapter 2	
Specification	Mandatory	Optional
		<ul style="list-style-type: none"> - Type of compound feed (for example specified what kind of mixture, type of animal, production of medicated feed, etc.) - If a company exclusively operates one or more phases/steps of the production process, these may be registered. - Toll manufacturer

Add-on scopes	Add-on scope	Add- on GMP+ Standard
	<ul style="list-style-type: none"> - Antibiotic-free production line(s) - Antibiotic-free production site - Dioxin-monitoring in laying hens (rearing) feeds - QM-Milch - Production of compound feed - CN - Production of compound feed - CEE - Production of compound feed - IT - Production of compound feed - VN - Production of compound feed - IP 	<p>See table 1 of Chapter 2</p>

FINAL DRAFT

3.1.2. Production of premixtures

GMP+ GMP+ Scope for certification	Production of premixtures	
Scope of accreditation	D. Animal Feed Production DI. Production of Feed.	
Description	<p>All activities related to the manufacturing of premixtures.</p> <p>In addition to actual production, this includes all activities required for production of premixtures, including planning, procurement, transshipment, storage, internal transport and packaging. Of course, also sales of the produced premixtures is included within this scope.</p> <p><i>Notes:</i> <i>Activities related to the delivery of the feed to customers are considered to belong to Transport. This is a separate scope.</i></p> <p><i>When storage is offered as a service to other companies, this is to be considered to belong to Storage and Transshipment. This is a separate scope.</i></p> <p><i>Sales of purchased feed products without any processing is considered to belong to Trade in Feed. This is a separate scope.</i></p>	
	See Table 1 in Chapter 2	
Specification	Mandatory	Optional
		<ul style="list-style-type: none"> - Type of premixture - If a company exclusively operates one or more phases/steps of the production process, these may be registered. - Toll manufacturer
Add-on scopes	Add-on scope	GMP+ standard
	<ul style="list-style-type: none"> - Production of premixtures - CN - Production of premixtures - CEE - Production of premixtures - IT - Production of premixtures - VN - Production of premixtures – IP 	See Table 1 in Chapter 2

3.1.3. Production of feed materials

GMP+ Scope for certification	Production of feed materials	
Scope of accreditation	D. Animal Feed Production DI. Production of Feed	
Description	<p>All activities related to the manufacturing of feed materials.</p> <p>In addition to actual production, this includes all activities required for production of the feed materials, including planning, procurement, transshipment, storage, internal transport and packaging. Of course, also sales of the produced feed materials is included within this scope.</p> <p><i>Notes:</i> <i>Activities related to the delivery of the feed to customers are considered to belong to Transport. This is a separate scope.</i></p> <p><i>When storage is offered as a service to other companies, this is to be considered to belong to Storage and Transshipment. This is a separate scope.</i></p> <p><i>Sales of purchased feed products without any processing is considered to belong to Trade in Feed. This is a separate scope.</i></p>	
	See Table 1 in Chapter 2	
Specification	Mandatory	Optional
		<ul style="list-style-type: none"> - If a company exclusively operates one or more phases/steps of the production process, these may be registered. - Toll manufacturer - "name of the feed material" – <i>It is highly recommended to use the FSP product list., More than one product can be listed.</i>
Add-on scopes	Add-on scope	GMP+ standard
	<ul style="list-style-type: none"> - QM-Milch - Production of feed materials - IT - Production of feed materials - VN - Production of feed materials - IP 	See Table 1 in Chapter 2

3.1.4. Production of feed additives

GMP+ Scope for certification	Production of feed additives	
Scope of accreditation	K. Production of (Bio) Chemicals	
Description	<p>All activities related to the manufacturing of feed additives.</p> <p>In addition to actual production, this includes all activities required for production of feed additives, including planning, procurement, transshipment, storage, internal transport and packaging. Of course, also sales of the produced feed additives is included within this scope.</p> <p><i>Notes:</i> <i>Activities related to the delivery of the feed to customers are considered to belong to Transport. This is a separate scope.</i></p> <p><i>When storage is offered as a service to other companies, this is to be considered to belong to Storage and Transshipment. This is a separate scope.</i></p> <p><i>Sales of purchased feed products without any processing is considered to belong to Trade in Feed. This is a separate scope.</i></p>	
	See Table 1 in Chapter 2	
Specification	Mandatory	Optional
		<ul style="list-style-type: none"> - If a company exclusively operates one or more phases/steps of the production process, these may be registered. - Toll manufacturer
Add-on scopes	Add-on scope	GMP+ standard
	- Production of feed additives -IP	See Table 1 in Chapter 2

3.1.5. Production of petfood

3.1.5.1. *Compound feed for petfood*

GMP+ Scope for certification	Production of compound feed (petfood)	
Scope of accreditation	D. Animal Feed Production DII Production of Pet Food	
Description	<p>All activities related to the manufacturing of compound feed for pets.</p> <p>In addition to actual production, this includes all activities required for production of feed additives, including planning, procurement, transshipment, storage, internal transport and packaging. Of course, also sales of the produced pet food is included within this scope.</p> <p><i>Notes:</i> <i>Activities related to the delivery of the feed to customers are considered to belong to Transport. This is a separate scope.</i></p> <p><i>When storage is offered as a service to other companies, this is to be considered to belong to Storage and Transshipment. This is a separate scope.</i></p> <p><i>Sales of purchased feed products without any processing is considered to belong to Trade in Feed. This is a separate scope.</i></p>	
	See Table 1 in Chapter 2	
Specification	Mandatory	Optional
		<ul style="list-style-type: none"> - If a company exclusively operates one or more phases/steps of the production process, these may be registered. - Toll manufacturer
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.1.5.2. Feed materials for petfood

GMP+ Scope for certification	Production of feed materials (petfood)	
Scope of accreditation	D. Animal Feed Production DII Production of Pet Food	
Description	<p>All activities related to the manufacturing of feed materials for petfood.</p> <p>In addition to actual production, this includes all activities required for production of the feed materials, including planning, procurement, transshipment, storage, internal transport and packaging. Of course, also sales of the produced feed materials is included within this scope.</p> <p><i>Notes:</i> <i>Activities related to the delivery of the feed to customers are considered to belong to Transport. This is a separate scope.</i></p> <p><i>When storage is offered as a service to other companies, this is to be considered to belong to Storage and Transshipment. This is a separate scope.</i></p> <p><i>Sales of purchased feed products without any processing is considered to belong to Trade in Feed. This is a separate scope.</i></p>	
	See Table 1 in Chapter 2	
Specification	Mandatory	Optional
		<ul style="list-style-type: none"> - If a company exclusively operates one or more phases/steps of the production process, these may be registered. - Toll manufacturer - "name of the feed material" – <i>It is highly recommended to use the FSP product list., More than one product can be listed.</i>
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.2. Distribution

3.2.1. Trade in Feed

GMP+ Scope of certification	Trade in Feed
Scope of accreditation	F. Distribution FII. Food Broking / Trading
Description	<p>Purchasing and subsequent selling of feed products. This concerns feed produced by third parties.</p> <p>The company becomes the owner of the feed.</p> <p>Notes:</p> <ul style="list-style-type: none"> - <i>The scope Trade in Feed must be specified. See for this the box Specification.</i> - <i>Activities related to the delivery of the feed to customers are considered to belong to Transport of feed. This is a separate scope.</i> - <i>The storage of feed products does not belong to the scope Trade in Feed.</i> - <i>In case of only direct trade to livestock farms it is possible to get GMP+ certification when complying with the Technical Specification TS 3.2 Production and trade of Pet foods.</i> - <i>When use is made of a toll manufacturer, the company still is to be certified with the scope Trade in Feed. Preferably, this scope is further specified with 'private labelling'. See also the specification box. For a company with this scope Private labelling, unannounced audits are not mandatory as part of the certification procedure. For more details about this, see the GMP+ rules of certification</i> - <i>A PO-box (Post Office box) is a uniquely addressable lockable box located on the premises of a post office station. A PO-box is often used on contracts or invoices and as such part of the selling process. As such, the PO box is part of the GMP+ feed chain and must be certified accordingly (scope: Trade in Feed). This provides transparency in the market by showing that the feed that is sold via this PO-box is covered within the GMP+ feed chain. There is no need to actually visit the location of the PO-box for certification purposes.</i> - <i>Sales offices: There are situations where a production plant is not selling the product directly to customers, but via a sales office which is often located at a different address and/or has a different name.</i>

	<p><i>On the Bill of Lading (B/L) the address and maybe the specific name of the production site could be mentioned but the sales are done via this sales office. This sales office can be the head office of a company with multiple production locations or an export company, but it is also possible that for example a separate billing office is used. In all such cases, a sales office is part of the GMP+ feed chain and should be certified accordingly (scope: Trade in Feed). It is up to the certification body to decide if an audit on-site is necessary.</i></p>	
	<p>See Table 2 in Chapter 2</p>	
Specification	Mandatory	Optional
	<p>Select one or more of the options:</p> <ul style="list-style-type: none"> - <i>Compound feed</i> - <i>Premixtures</i> - <i>Feed additives</i> - <i>Feed materials</i> 	<ul style="list-style-type: none"> - The traded feed may be further specified in addition to the mandatory section. - Private labelling
Add-on scopes	Add-on scope	GMP+ standard
	<ul style="list-style-type: none"> - QM-Milch - Trade in Feed -IT <ul style="list-style-type: none"> - <i>Compound feed</i> - <i>Premixtures</i> - <i>Feed materials</i> - <i>Feed additives</i> - Trade in Feed -VN <ul style="list-style-type: none"> - <i>Compound feed</i> - <i>Premixtures</i> - <i>Feed materials</i> - <i>Feed additives</i> - Trade in Feed -IP <ul style="list-style-type: none"> - <i>Compound feed</i> - <i>Premixtures</i> - <i>Feed materials</i> - <i>Feed additives</i> 	<p>See Table 2 in Chapter 2</p>

3.2.2. Trade in Feed (pet food)

GMP+ Scope of certification	Trade in Feed (pet food)	
Scope of accreditation	F. Distribution FII. Food Broking / Trading	
Description	<p>Purchasing and subsequent selling of feed products. This concerns feed produced by third parties.</p> <p>The company becomes the owner of the feed.</p> <p><i>Notes:</i> The scope Trade in Feed (petfood) must be specified. See for this the box Specification.</p> <p>Activities related to the delivery of the petfood to customers are considered to belong to Transport. This is a separate scope.</p>	
	See Table 2 in Chapter 2	
Specification	Mandatory	Optional
	Select one or more of the options: - Compound feed - Feed materials	- The traded feed may be further specified in addition to the mandatory section.
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.2.3. Trade to livestock farms

GMP+ Scope of certification	Trade to livestock farms	
Scope of accreditation	F. Distribution FII. Food Broking / Trading	
Description	Purchasing and subsequent selling of feed products to livestock farmers . Also storage and transport of packaged feed is covered under this scope feed. See for more details the standard The company becomes the owner of the feed.	
	See Table 2 in Chapter 2	
Specification	Mandatory	Optional
	None	- The traded feed may be further specified
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.3. Provision of transport and storage services

3.3.1. Storage and Transshipment of feed

GMP+ Scope of certification	Storage and Transshipment of feed
Scope of accreditation	G. Provision of Transport and Storage Services
Description	<p>All activities related to the storage and transshipment of feed products, and activities which are in general carried out by storage/collection companies</p> <p>Storage activities aim to create and maintain safe conditions in order to preserve the main characteristics of the feed product and to avoid developments of any hazards. Transshipment activities often include a change in the means of transport of a feed product.</p> <p>More in detail:</p> <ul style="list-style-type: none"> - all activities necessary to enable good storage or transshipment, such as planning, internal transport and (intermediate) storage. It includes further any activity which is to be considered as part of Good Storage Practices, including hygiene measures, pest control (including fumigation), preservation measures (e.g. with acids), etc. - Activities which are in general carried out by storage/collection¹ companies: <ul style="list-style-type: none"> - Bulking of feed: Transferring goods from a smaller unit into a bigger unit. For example: from bags into a bulk wagon/loading compartment, or from small containers into a tank; - Bagging of feed: Transferring goods from a bigger unit into a smaller unit. For example: Packing of crude feeds in bales (cover in any wrap, make a package or packages); or from a tank into a smaller container, or from a bulk store into big bags, etc. - Decortication: Complete or partial removal of outer layers from grains, seeds, fruits, nuts and others; - Dehulling: Removal of the outer skins of beans, grains and seeds usually by physical means; - Blending: mixing of two or more batches of the same feed product for standardization or to increase the batch size. (Note: Blending performed to dilute regulated contaminants is forbidden); - Addition of water to, for example, molasses during storage; - Chopping: Reduction of particle size using one or more knives;

¹ Note that in the GMP+ FC scheme a special scope for collection of primary products is not defined. Collection is indicated with the 2 scopes Trade and Storage.

	<ul style="list-style-type: none"> - Crushing: activity where whole grains are squeezed to flat grains like flakes. - Fragmentation: Process of breaking a feed material into fragments 	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	When applicable * Storage can be provided as a service * Transshipment can be provided as a service
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

FINAL DRAFT

3.3.2. Road transport of feed

GMP+ Scope of certification	Road transport of feed	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>All activities related to the transport of feed by road.</p> <p>Not only the physical transport is understood by this, but also all activities that enable the transport, such as planning, purchase, maintenance, cleaning and administration.</p> <p><i>Notes:</i></p> <ul style="list-style-type: none"> - <i>Internal transport (see for a definition F 0.2 Definition list) of feed, whether carried out by own means or by a subcontractor, must be assured in compliance with requirements in TS 1.9 Transport activities. However, it is not necessary to issue a scope Road transport of feed.</i> 	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	<ul style="list-style-type: none"> - Specification of type of loading (for example bulk, liquids, packaged goods, etc.) - Transport can provided as a service
Add-on scopes	Add-on scope	GMP+ standard
	<ul style="list-style-type: none"> - Road transport of feed -IT - Road transport of feed -IP 	See Table 3 in Chapter 2

3.3.3. Rail transport of feed

GMP+ Scope of certification	Rail transport of feed	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>All activities related to the transport of feed by rail.</p> <p>Not only the physical transport is understood by this, but also all activities that enable the transport, such as planning, purchase, cleaning and administration.</p>	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	Specification of type of loading (for example bulk, liquids, packaged goods, etc.)
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.3.4. Inland waterway transport of feed

GMP+ Scope of certification	Inland waterway transport and short sea shipping of feed	
Scope of accreditation	-	
Description	Transport of feed via inland waterways and short sea shipping. Not only the physical transport is understood by this, but also all activities that enable the transport, such as planning, purchase, cleaning and administration.	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	Specification of type of loading (for example bulk, liquids, packaged goods, etc.)
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.3.5. Affreightment of transport of feed

GMP+ Scope of certification	Affreightment of inland waterway transport	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>Under this scope all activities can be carried out that relate to freight brokerage. This relates to the entire process of accepting the order, selecting and accepting a loading compartment, the instruction for inspection, the performance of and the report on the inspection the approval of the loading compartment based on the positive LCI report and the updating of administrative records.</p> <p>Also companies who carry out part of the activities, like brokers or commission agents (so-called "runners") who act as a mediator between shippers and affreightment parties, fall within the scope of this standard.</p> <p>The actual transport (loading, transport and unloading) is not included in this scope.</p>	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

GMP+ Scope of certification	Affreightment of rail transport	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>Under this scope all activities can be carried out that relate to freight brokerage. This relates to the entire process of accepting the order, selecting and accepting a loading compartment, the instruction for inspection, the performance of and the report on the inspection the approval of the loading compartment based on the positive LCI report and the updating of administrative records.</p> <p>Also companies who carry out part of the activities, like brokers or commission agents (so-called "runners") who act as a mediator between shippers and affreightment parties, fall within the scope of this standard.</p> <p>The actual transport (loading, transport and unloading) is not included in this scope.</p>	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

GMP+ Scope of certification	Affreightment of road transport	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>Under this scope all activities can be carried out that relate to freight brokerage. This relates to the entire process of accepting the order, selecting and accepting a loading compartment, the instruction for inspection, the performance of and the report on the inspection the approval of the loading compartment based on the positive LCI report and the updating of administrative records.</p> <p>Also companies who carry out part of the activities, like brokers or commission agents (so-called "runners") who act as a mediator between shippers and affreightment parties, fall within the scope of this standard.</p> <p>The actual transport (loading, transport and unloading) is not included in this scope.</p>	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

GMP+ Scope of certification	Affreightment of sea transport	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>Under this scope all activities can be carried out that relate to freight brokerage. This relates to the entire process of accepting the order, selecting and accepting a loading compartment, the instruction for inspection, the performance of and the report on the inspection the approval of the loading compartment based on the positive LCI report and the updating of administrative records.</p> <p>Also companies who carry out part of the activities, like brokers or commission agents (so-called "runners") who act as a mediator between shippers and affreightment parties, fall within the scope of this standard.</p> <p>The actual transport (loading, transport and unloading) is not included in this scope.</p>	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

GMP+ Scope of certification	Affreightment of short sea shipping	
Scope of accreditation	G. Provision of Transport and Storage Services	
Description	<p>Under this scope all activities can be carried out that relate to freight brokerage. This relates to the entire process of accepting the order, selecting and accepting a loading compartment, the instruction for inspection¹, the performance of and the report on the inspection the approval of the loading compartment based on the positive LCI report and the updating of administrative records.</p> <p>Also companies who carry out part of the activities, like brokers or commission agents (so-called "runners") who act as a mediator between shippers and affreightment parties, fall within the scope of this standard.</p> <p>The actual transport (loading, transport and unloading) is not included in this scope.</p>	
	See Table 3 in Chapter 2	
Specification	Mandatory	Optional
	None	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.4. Laboratory activities

3.4.1. Laboratory testing

Scope of certification	Laboratory testing	
Scope of accreditation	-	
Description	All activities related to performing analyses of feed. In addition to actual analyzing of feed, this includes all activities required for performing analyses, including receiving, storing and treatment of samples, analysis, registration, reporting and archiving.	
	See Table 4 in Chapter 2	
Specification	Mandatory	Optional
	Specification of analysis	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.4.2. Registered laboratory

Scope of certification	Registered laboratory	
Scope of accreditation	-	
Description	All activities related to achieving performance criteria for analyses of feed.	
	See Table 4 in Chapter 2	
Specification	Mandatory	Optional
	Specification of analysis	None
Add-on scopes	Add-on scope	GMP+ standard
	Not applicable	Not applicable

3.5. Feed responsibility activities

Scopes of certification	RTRS Segregation RTRS Mass Balance	
Scope of accreditation	-	
Description	Under these scopes all activities can be carried out that are related to production and/or trade of RTRS soy (including soy byproducts). The applicable scope depends on the used supply chain model: Segregation or Mass Balance.	
	See Table 5 in Chapter 2	
Specification	Mandatory	Optional
	Not applicable	Not applicable

Scope of certification	Responsible pig & poultry feed	
Scope of accreditation	-	
Description	Under this scope all activities can be carried out that are related to production and/or trade of responsible pig & poultry feed.	
	See Table 5 in Chapter 2	
Specification	Mandatory	Optional
	Not applicable	Not applicable

Scope of certification	Responsible dairy feed	
Scope of accreditation	-	
Description	Under this scope all activities can be carried out that are related to production and/or trade of responsible dairy feed.	
	See Table 5 in Chapter 2	
Specification	Mandatory	Optional
	Not applicable	Not applicable

Scopes of certification	Production of compound feed - GMO controlled Production of feed materials - GMO controlled Production of premixtures - GMO controlled Production of feed additives - GMO controlled Trade in feed - GMO controlled Storage and transhipment of feed - GMO controlled Road transport of feed - GMO controlled	
Scope of accreditation	-	
Description	<p>Under these scopes all activities can be carried out that are related to production and/or trade of GMO controlled feed. Also the services transport and storage can be carried out under this scope.</p> <p><i>Note:</i></p> <ul style="list-style-type: none"> - <i>Even though there are a lot of scopes, a GMP+ certified company will only pay for 1 scope when certified for this standard (even if multiple scopes are applicable)</i> 	
	See Table 5 in Chapter 2	
Specification	Mandatory	Optional
	Not applicable	Not applicable
