

Each transport company must identify, analyse, and control company-specific feed safety hazards by applying HACCP principles in accordance with <u>R 1.0 Feed Safety Management System Requirements</u>.

To help transport companies with this, GMP+ International has various services available. These services are intended to support you in setting up your own HACCP system.

Overview of the services:

Make analysis

Get more insight into risks, create your own HACCP analysis. First read the reading guide HACCP transport for a short explanation.
