TS1.3 - Product list

Version EN: 1 March 2021

Index

1. PRODUCT LIST	3
------------------------------	----------

1. Product list

The GMP+ certified company may only use feed materials that have been assessed and accepted for use in feed by GMP+ International. This document, the Product list, is the list of accepted feed materials that can be produced and traded within the GMP+ certified chain.

Each feed material that is produced and/or purchased within the GMP+ certified chain must be:

- a. included in the Product list, and
- b. produced in accordance with the generic process descriptions in the Risk Assessments in the [Risk Management tools \(RMT\)](#).

To consult the Product list click [here](#).

Feed Support Products

That was a lot of information to digest and one might ask, what is the next step? Luckily we can offer support for the GMP+ Community when doing this. We provide support by means of various tools and guidances but as each company has a shared responsibility to feed safety, and therefor tailor-made solutions cannot be offered. However, we do help by explaining requirements and provide background information about the requirements.

We have developed various supporting materials for the GMP+ Community. These include various tools, ranging from Frequently Asked Questions (FAQ) lists to webinars and events.

Risk Management tools (RMT)

Risk Management tools (RMT) provides valuable and up-to-date information about potentially high-risk feed. The products vary from flow charts of production processes including the risks (Risk Assessments) and studies on undesirable substances (fact sheets).

Find our Risk Management tools (RMT) here:

GMP+ Platform
